

Summary

Curious and motivated fresher with a strong desire to embark on a career in an entry-level position where I can contribute to exciting projects and further enhance my expertise. Adaptable and quick to learn, I am committed to continuous learning and growth.

Education

CMR Institute Of Technology B.Tech.[AI & ML] CGPA : 7.65	Oct. 2021 – Sep 2025 <i>Hyderabad, Telangana</i>
Government Polytechnic [Diploma] CGPA : 8.88/10	Jun. 2019 – May 2022 <i>Medchal, Telangana</i>
Sri Sathya Sai Gurukula Vidya Nikethan 10th[SSC] CGPA : 8.8	Jun. 2018 – May 2019 <i>Siddipet, Telangana</i>

Technical Skills

- **Languages:** C, Java, Python.
- **Web Development:** HTML, CSS.
- **Databases:** SQL, MongoDB.
- **Developer Tools:** VSCode, Google Colab, Git, Github.
- **Soft Skills:** Communication, Time Management, Team building, Leadership.
- **Extra Skills:** MS-Office, Documentation.

Relevant Coursework

- Internet of Things
- Operating Systems
- Artificial Intelligence
- Database Management System

Projects

Detecting Botnet Attacks in IOT Environments An Optimized Machine Learning Approach

This project focuses on using machine learning to identify botnet attacks in Internet of Things Environments. By optimizing the detection methods, it aims to improve security and efficiency, And the IOT devices are protected from malicious network threats effectively.

Data Driven Energy Economy Prediction for Electric City Buses Using Machine Learning

This project focuses on battery electric buses (BEB) and addresses the need for a deep understanding of real-world driving data to improve vehicle design and fleet operation. It highlights the inefficiency and high costs arising from conservative design due to uncertainties in energy demand.

Certifications

- Certified for Python Project at CodSoft
- Python Programming internship certificate from EDUGENE
- Completed AICTE Cohort 5 Cloud Computing internship
- Got badge in Microsoft Copilot for Security
- Got badge in Fundamentals of Generative AI
